

LSGG : time to think about winter parking!

PRESS RELEASE - NOVEMBER 2014

Based on the success of these past months, the Geneva Airpark team is more than ever ready to welcome its clients for a 5th winter at Geneva International Airport.

In order to deal with the growing demand to shelter business jets, Geneva Airpark is offering a global solution for business aviation, with daily, week-end or long term hosting possibilities, along with new additions to the range of made-to-measure services, which are more and more appreciated by the clients.

Short term contracts: Geneva Airpark has recorded a 28 % increase in business since the beginning of 2014.

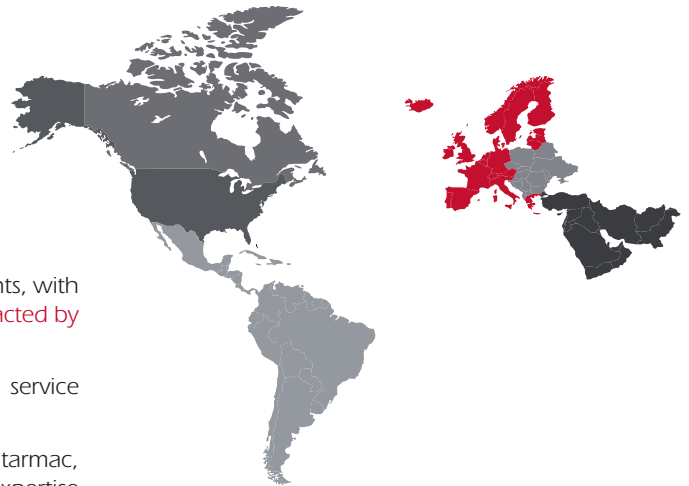

▪ 30 new clients

▪ 100 aircrafts sheltered

▪ 40 % from the Middle East, USA, Canada, Latin America and Eastern Europe
▪ 60 % from Europe

In addition, Geneva Airpark still has a client base of annual adherents, with over 30 different types of aircraft, that is loyal and increasingly attracted by the addition of new services.

Geneva Airpark forecasts a 10 % progression in 2014 for these service activities.

Geneva Airpark offers its clients an exceptional infrastructure (tarmac, hangar, towing, office space, WiFi), a team recognized for its expertise and availability and an increasingly comprehensive range of services (pre-flight assistance, aircraft cleaning, tire pressure, video surveillance, water/toilet, laundry etc.).

Thanks to these features, Geneva Airpark has become the preferred occasional and regular hosting solution for business aviation to deal with the frequent constraints on Geneva International Airport.
